

Ultimate

This powerful cocktail is THE ultimate in promoting calmness and relaxation. It contains a carefully balanced mix of relaxing Magnesium Sulphate, calming B Complex Vitamins, and the benefits of Vitamin C and Zinc.

Why we love it.....

Magnesium Sulphate is chemical agent that is known to lower blood pressure when given IV and may also help with:

- ~ Calming feelings of anxiety and fatigue
- ~ Promoting a good night's sleep
- ~ Muscle relaxation
- ~ Preventing headaches and migraines
- ~ Improving energy levels and mood
- ~ Optimising brain function
- ~ Being a great starting point for clients new to IV therapy

Magnesium Sulphate is also used in non-IV applications such as Epsom Salts which can also assist in calming the body, mind and muscles

How we use it.....

This formulation is administered monthly but once per week is an option

Ultimate can also be administered as a once off infusion

Add-on shots.....

CYF - contains taurine and serine to assist in managing psychological stress and anxiety

Rejuvenate

This antioxidant cocktail has been designed to repair and target the body's revitalisation process from the inside out. This blend is a body and complexion booster.

Why we love it.....

This formulation contains Vitamin C, Vitamin B Complex, with carefully added Amino Acids. It aims to boost the immune system and fight free radical molecules that contribute to ageing and tissue damage. It also assists the body to utilise protein and improve your energy levels. This formulation is also designed to brighten your skin as well plump it up. It targets sun-damaged and ageing skin making your skin and body glow.
ALLERGY PRECAUTION: Contains sulphate compounds

How we use it.....

This formulation is best used in combination with in-clinic treatments (skin needling, wrinkle relaxant, fillers, IPL photo-rejuvenation, or Platelet Rich Plasma (PRP)) as recommended by your therapist. The combinations of treatment work synergistically to amplify results.
We recommend monthly infusions which can be increased to weekly depending on results.

Add-on shots.....

Biotin - to boost condition of skin hair and nails

Relax and Unwind

This powerful combination of ingredients is designed to leave you with a calmer mind so that you start to achieve your full potential. If you feel that your brain is working overtime and you are endlessly playing catch-up this combination can leave you refreshed, revitalised.

Why we love it.....

This soothing and calming formulation contains amino acids, B Group Vitamins and Vitamin C to boost mental clarity, lift brain fog and optimise brain function. It aims to improve mental clarity. The Magnesium content assists in lowering stress levels and levelling blood pressure.

How we use it.....

We recommend monthly infusions which can be ramped up to a weekly infusion if desired. This formulation can be administered as a once off post mental workout such as exams.

Add-on shots.....

Biotin - improves hair, skin and nails which may suffer during times of stress

Performance and Recovery

This powerful combination of rehydration and essential nutrients helps the body to recover after a challenging workout or competition. If you train hard this blend is for you!

Why we love it.....

This formulation has many elements to help after a workout or competition:

- ~ Flushes out free radicals
- ~ Fast rehydration and increases stamina
- ~ Helps to improve future athletic performance and reduce recovery time
- ~ Contains Vitamin C and Magnesium Sulphate
- ~ Contains Amino Acids that act as secretagogues which may help increase natural release of growth hormone from the pituitary

How we use it.....

This is usually administered monthly but weekly use is an option. As a once off. Prior to, or after, a challenging sporting event.

Add-on shots.....

PolyMVA Shot - given as an intramuscular (IM) shot

- ~ This may assist in boosting immune response and by replenishing key nutrients and supporting cellular metabolism
- ~ Prevent cell damage and increase oxygenation to cells
- ~ Support nerve and neurotransmitter functions
